- karimicabinet.com | wordpress
- Simple sport tournaments system | Zend Framework
- MDF cuts calculator - web based - PHP and python
- Frontlinesecurity.ca | customized wordpress | a Canadian company order

Freelancer

PHP Programmer

2010 - 2011

I started learning the PHP programming language in 2010.

After that I started working on my own idea as an advertisement website. (**cbest.ir**)

The idea behind that was about making a website for physical stores which would include details of their products. but after a while I changed that to an advertisement website the same as Istgah.

Working on two other projects (1118.ir and packlook.com)

1118.ir was a social website about sport.

packlook.com was a simple social network website.

...

Freelancer

2007 - 2010

Visual Basic 6

I started programming with VB6 just for personal use!

SKILLS
